Codes & Standards Conference

An element of the U.S. Department of Energy Hydrogen Fleet Demonstration and Validation Program

September 14, 2006 - 8:30 AM - 4:30 PM

Agenda will include:

Review of Hydrogen fleet demonstration locations and progress

Overview of experiences, issues, and lessons learned in the permitting process of Hydrogen infrastructure in the U.S.

Recommendations to accelerate the implementation of Hydrogen infrastructure

Update on the progress of Hydrogen infrastructure codes and standards development at international, federal, and state levels

Discussion on emergency first responder education and training activities, feedback, and plans for future efforts

Presenters will include automotive and energy companies engaged in Hydrogen fleet projects; codes and standards development organizations; federal, state, and local authorities involved in codes and standards development and enforcement; and organizations involved in first responder awareness and training.
